

IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF VIRGINIA
ROANOKE DIVISION

GEORGE FREDERICK DELANEY,

Plaintiff,

v.

Case No. 7:08cv465

ROBERT MARSH, M.D.,
CAROLYN MACLAM, RN,
DANIEL BRAXTON and
FRED SCHILLINGS

Defendants

DECLARATION OF

POWELL

The undersigned, Powell, hereby declares under penalty of perjury, pursuant to
28 U.S.C. § 1746, as follows:

1. I am the custodian of medical records at Powhatan Correctional Center.
2. The attached documents are true copies of records that reflect the treatment of
Inmate George Delaney and are maintained at Powhatan Correctional Center.
3. The attached medical records are kept in the ordinary course of business. It is the
regular practice of facility employees and/or doctors to make these records. They were made at
or near the time of treatment by a person with knowledge of the Inmate George Frederick
Delaney's condition.

I declare under penalty of perjury that the foregoing is true and correct.

EXECUTED on this 1 day of April, 2009.

Powell m.f.

Re: George Fredrick Delaney v. Robert Marsh, M.D., et al.
USDC, Roanoke, Case No. 7:08cv465

Dear Ms. Maclam:

Our firm has been retained by the Division of Risk Management to represent Head Nurse Carolyn Maclam of the Augusta Correctional Center in a lawsuit brought by George Frederick Delaney.

This letter is to request the medical records of George Frederick Delaney, Inmate number #374390, who is currently housed at your facility. These records are necessary for the defense of Ms. Maclam. Mr. Guynn, the attorney for Carolyn Maclam, has requested the records be faxed if possible. If they are too voluminous, we ask that you please forward them to us as soon as you possibly can.

I have also attached a declaration authenticating the records. Please sign this and return it with the medical records. We appreciate your kind assistance with this case.

Very truly yours,

GUYNN, MEMMER & DILLON, P.C.

Report

Ordering Physician: ISAACS MD, JONATHAN E

CLINICAL STATEMENT: pain

TECHNIQUE: Three views of the left hand were obtained.

FINDINGS: There is normal bone mineralization. There is no evidence for displaced fracture.

Narrowing and sclerosis demonstrated at the fifth proximal interphalangeal joint, consistent with osteoarthritis. There is minimal ulnar subluxation of the joint, as well. This may represent a sequela of old trauma. There is otherwise preservation of joint space without significant osteoarthritis or evidence for dislocation or subluxation.

There is normal bone mineralization. There is no evidence for displaced fracture.

No focal soft tissue swelling is apparent.

No prior studies are available for comparison.

IMPRESSION:

Possible posttraumatic osteoarthritis at the fifth proximal interphalangeal joint.

Following the National Kidney Foundations recommendations, the GFR has not been validated in patients who are <18 years or >70 years. Therefore, it is not reported in this patient.

eGFR NonAfrican Am

eGFR African Amer

50

60

eGFR less than 60 (ml/min/1.73) square meters may indicate chronic kidney disease. This is an estimated GFR based on the Modification of Diet in Renal Disease (MDRD) equation (Ann Intern Med 1999;130:461-70.), results for which depend on race. This estimate should not be used for renal-dosing of medications or dosing adjustments of radiocontrast dye without patient-specific correction for height and weight. Limitations of the eGFR, guidelines on chronic kidney disease definitions, and clinical action plans can be found at www.kidney.org and NEJM 2006;354:2473-83. An estimated GFR cannot be calculated, because the patient's age was not provided. See http://www.kidney.org/professionals/KDOQI/gfr_calculator.cfm to calculate the eGFR with the appropriate age.
